

If you are scanning to the Enterprise File Server (EFS) with the new Xerox printers, we have found the following to work (where some this is obviously examples based on where you are trying to scan to):

Default Repository Protocol: SMB

Type: Host Name

Default Repository Server: grove.ad.uconn.edu:445

Share: EFS

Default Repository Path (example): Athletics\scanned_documents

Default Repository Login Credentials: System

Login Name: uconn\“Your service account”

Remember if you need more than one folder to scan to, you would need to create a scan template for each folder someone wants to scan to.

The screenshot shows the Centware Internet Services web interface for a Xerox WorkCentre 7845. The page title is "XEROX WorkCentre 7845" and the user is logged in as "admin". The navigation menu includes Status, Jobs, Print, Scan, Address Book, Properties, and Support. The left sidebar shows a tree view of configuration options, with "File Repository Setup" selected under "Workflow Scanning". The main content area is titled "File Destination" and contains the following settings:

- File Destination Settings:**
 - Friendly Name:** Sports Medicine (Example: Purchasing Department)
 - Default Repository Protocol:** SMB (Selected)
 - Default Repository Server:** grove.ad.uconn.edu : 445 (Selected: Host Name)
 - Share:** EFS
 - Default Repository Document Path:** Athletics\Sports Medicine-Trainers\Scanned (Sub-folder (.XSM) for 1 File Per Page, File Format jobs is unchecked)
 - Default Repository Login Credentials:** System (Selected: System)
- Advanced Settings:**
 - Prefer Filing with Kerberos Ticket:** (Link)
 - Login Name:** uconn (Selected: Authenticated User and Domain)
 - Password:** (Field)
 - Retype password:** (Field)
 - Select to save new password:** (Unchecked)
